

Greater Los Angeles County WaterTalks: Sleepy Lagoon Maywood Riverfront Park

Summary Memo

Prepared by: Peter Massey, TreePeople

The Maywood Riverfront Park project was identified as a top priority project by the WaterTalks Leadership Group of CBOs to meet the high priority needs of community members in the Greater LA County Integrated Regional Water Management Region and specifically in the Lower San Gabriel and Los Angeles Rivers IRWM Sub Region.

The Sleepy Lagoon project celebrates an historic area important to Native American and Latino communities. It was in development prior to the WaterTalks Program, including design and fundraising for physical and cultural improvements. WaterTalks primarily explored the feasibility of stormwater capture at the Park site, and supported project-specific community outreach during the grant period.

More project information is included in the Stormwater Capture Technical Report (deliverable). The Report references multiple Appendices, however only Appendix C (Analytical Groundwater Mounding Analysis Memo) was developed through WaterTalks. All appendices have been included so interested parties can understand, support and learn from the entire project – which is truly inspiring.

Project Package:

- Stormwater Capture Technical Report (WaterTalks)
- Appendix A – Safe Clean Water Program Regional Program Funding Process
- Appendix B - Sleepy Lagoon Final Report
- Appendix C - Analytical Groundwater Mounding Analysis Memo (WaterTalks)
- Appendix D1 - Maywood Sewer Model Tech Memo 2019
- Appendix D2 - Wet Weather Tech Memo 2020
