### Description:

Residents were given a brief overview of the WaterTalks program. They were then asked to share about 1) their communities strengths, 2) community needs and 3) water related issues. The meeting was provided in both English and Spanish.

### Questions / Comments:

Key takeaways include a sense of resilience in the community, and a need for healthy food to offset too many fast food restaurants. Drinking water concerns were high, as well as oily runoff in the streets when it rains due to car shops in the area. Also a lot of illegal dumping on the streets. Nuisance stormwater flooding locations were noted on a digital map.
