Description:

Residents were given a brief overview of the WaterTalks program. They were then asked to share about 1) their communities strengths, 2) community needs and 3) water related issues. The meeting was available in both English and Spanish.

Questions / Comments:

Key takeaways include pride in water infrastructure including recycled water in a local park and stormwater capture on certain street medians. Needs related to trees were discussed: more trees for shade, water for trees, education around residential wasting water. Homelessness is a notable concern as well as over development and transportation. Challenged by government support and accessibility, but appreciate good, affordable drinking water from LADWP. Nuisance stormwater flooding locations were noted on a digital map.
