Description:

The meeting was held in Spanish. Residents were given a brief overview of the WaterTalks program. They were then asked to share about 1) their communities strengths, 2) community needs and 3) water related issues.

Questions / Comments:

Key takeaways include a sense of resilience in the community. Drinking water concerns were high, as well as oily runoff in the streets when it rains due to car shops in the area. Also a lot of illegal dumping on the streets. Nuisance stormwater flooding locations were noted on a digital map.
