### Description:

The title was "Learn How to be a Water Protector--Water Talks- Greater Willowbrook/Watts/Watts Proper" and the Zoom link was: [bit.ly/WaterWillowbrookWatts](https://bit.ly/WaterWillowbrookWatts).

### Questions / Comments:

Greater Athens-Greater Willowbrook and Watts Proper-Watts West communities were in this group. This community discussed and showed interest in flood zones, water collection, workforce development, residential and commercial solutions, and capital projects they would like to see implemented as well as an interest in learning and participating more in the Measure W Process. There was a great concern of the safety of water such as drinking water quality, as they expressed their history of contaminated water and would like information on how to address issues relative to water. Also, walkable street and permeable surfaces, and school and new housing development mandates and projects was of deep interest. Storm water capture and grey waters projects were mentioned. The group would like to have follow-ups after the survey and plan what is best for them as a community.
